

FIVE SHUTTER CARE TIPS

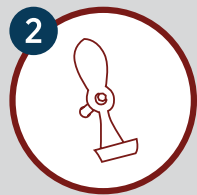

Keep your Timberlane Shutters looking beautiful for years to come!

Here are some annual tips.

1 Brush away debris that has collected behind the shutters. Say good-bye to twigs, leaves and even nests!

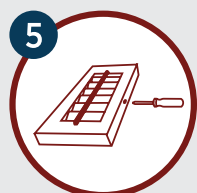

2 Check your hardware. Wipe down and touch up any nicks with a rust-preventative paint, available at your local hardware store.

3 Wash shutters gently with a mild soap solution and soft cloth. Then, allow them to dry in the sun.

4 Secure capping. If capping is loose, gently remove it, add clear silicone caulk to the underside, and reapply.

5 If you have operable louvers, tighten louver tension screws, which can be found along the sides of shutters.
